## PROFESSIONAL SUMMARY

Software Engineering student and aspiring **Full-Stack Developer** with hands-on experience building web applications using modern frontend technologies. Experienced in **React, TypeScript, Tailwind CSS, Zustand, and REST APIs**, with current hands-on learning and development in **Node.js, Express.js, MongoDB, and Mongoose**. Experienced in team-based software development, Git/GitHub collaboration, UI/UX design with Figma, and problem-solving. Passionate about learning new technologies, building practical solutions, and continuously improving software development skills.

## SKILLS

- Time Management
- Project management
- Teamwork & Collaboration
- Program evaluation
- Lead a team of 5 member
- Good at Communication
- Ability to Work Independently and also in team

## COMMUNITY SERVICE & VOLUNTEER WORK

**Content Creator — @mindful\_bytes (Telegram):** Create and share educational, motivational, and personal-growth content while engaging with the community.

## WORK EXPERIENCE

### TASK MANAGEMENT SYSTEM INTERN

May 2026 - Current

*Yai P.l.c, Jimma, OR*

- **UI/UX Design** — designed and planned interfaces using **Figma**
- **Frontend Development** — built the application using **React + TypeScript**
- **UI Development** — designed responsive interfaces using **Tailwind CSS**
- **State Management** — implemented global state management with **Zustand**
- **Form Management** — used **React Hook Form** for form handling
- **Form Validation** — implemented schema validation using **Zod**
- **Routing** — implemented navigation and protected routes using **React Router**
- **Task Management** — developed task creation, editing, deletion, status, priority, assignee, due-date, and tag functionality
- **Reusable Components** — created reusable UI components to maintain consistency and reduce code duplication
- **Debugging** — identified and resolved UI, state-management, routing, and form-validation issues
- **Backend Development** — **Currently working on the backend** — building the server-side architecture and APIs using **Node.js, Express.js, MongoDB, and Mongoose**
- **API Development** — currently learning and implementing RESTful APIs and connecting the backend with the React frontend
- **Full-Stack Development** — expanding the project from a frontend application into a complete full-stack system

### BEAUTY SALON APPOINTMENT SYSTEM INTERN

May 2026 - Current

*Semantha P.l.c, Jimma, OR*

- **Authentication & Authorization** — contributed to implementing user authentication and access control.
- **Landing Page Development** — designed and developed the landing page and its responsive UI.
- **Frontend Development** — built and integrated reusable React components.
- **Responsive Design** — implemented responsive interfaces using React and Tailwind CSS.
- **Team Collaboration** — worked collaboratively with a 6-member development team.
- **Git & GitHub** — used Git for version control, branching, commits, merging, and collaborative development.
- **Code Integration** — contributed to integrating team members' work and resolving conflicts.
- **Communication** — coordinated with team members to divide tasks, discuss implementation, and solve problems.
- **Project Structure** — followed a component-based and organized React project structure.
- **Problem Solving** — worked with the team to troubleshoot technical and UI issues.
- **Backend Development** — **Currently in progress** — Node.js, Express.js, MongoDB, and Mongoose

## EDUCATION

### BACHELOR OF SOFTWARE ENGINEERING

May 2029

*Addis Ababa University, Addis Ababa*
